SUMMARY

A Software Development Graduate with a love of solving problems with code. After some years away from tech, I'm committed to begin afresh my career as a Web Developer. Currently self-teaching via The Odin Project, while also working on small projects for friends and associates.

EXPERIENCE

Shop Manager & Cook | 09/2020 - 08/2023

Ferryhill Fish & Chips, Irlam, Manchester
I take pride in my rapid progression from trainee to shop manager within a short time frame, all while contributing to the success of this well-established shop. Developing a responsive web page for this business was my first real-world project.

Graduate Software Developer | 09/2019 - 11/2019

Yozu Ltd., Liverpool, Merseyside
Eagerly embraced the role of Junior Software Developer at a fast-growing software company during a short but impactful two-month term, where I worked with Ruby on Rails, React Native and RSpec Testing.
NOTE: *Overcome with stress due to family issues, and for the sake of my mental health, I had to make the difficult decision to leave this job prematurely and take a step back from my career.*

Junior Software Engineer Intern | 06/2017 - 08/2017

Ericsson, Athlone, Ireland
A short-term internship which gave me an all-important inside glimpse into the world and work of a big tech company. In my time there, I gained essential knowledge of:

- Teamwork
- JUnit Testing
- Linux OS & Bash
- Agile Methodologies

EDUCATION

Bachelor of Engineering (Hons) in Software Development | 09/2018 - 06/2019

Technological University of the Shannon, Athlone, Ireland
Grade: First Class Honours

Bachelor of Engineering in Computer Engineering | 09/2015 - 06/2018
